

Health Plans

- Students requiring any regular medication or medical intervention must have a current health plan. Please talk to the First Aid Officer about the process for this.
- Children with asthma need to have a health plan signed by a doctor and should have their puffers in school.
- Children who suffer anaphylactic reactions to foods or insects such as ants or bees also need a health plan and their medication in school.
- If parents have indicated on the school Enrolment Form that their child has diagnosed health issues an up-to-date health care plan must be provided to the school upon enrolment.

Hire of School Facilities

Use of School Premises and Facilities for Other Than School Purposes

The Principal, in consultation and agreement with school council, may grant permission to organisations not connected with the school to use the school premises in and out of school hours. The community is welcome to make use of these facilities. Further information is available at the school.

Homework

It is an expectation that all students will read regularly at home. This is important for all aspects of their learning. Spelling lists and tables are set and occasionally some project research or unfinished work. Sometimes students may be given work to do at home that they have not completed in class but generally the amount of homework set is minimal. As teachers we acknowledge that children and parents have busy lives outside of school and that the activities they are involved in are important.
